

5. On the **Choose E-mail Service** page, select **Internet E-mail**, and then click **Next**.

6. On the **Internet E-mail Settings** page, enter your email account information as follows:

Your Name

Enter your first and last name.

E-mail Address

Enter your email address.

Account Type

Select **POP3**.

Incoming mail server

Type **pop.secureserver.net** for your incoming mail server.

Outgoing mail server (SMTP)

Type **smtput.secureserver.net** for your outgoing mail server.

User Name

Enter your email address again.

Password

Enter the password you created for your email account.

7. Select the **Remember Password** checkbox, and then click **More Settings**.

8. In the Internet E-mail Settings window, go to the **Outgoing Server** tab. Check **My outgoing server (SMTP) requires authentication** and select **Use same settings as my incoming mail server**.

9. Go to the **Advanced** tab. Verify that you have **110** for your incoming server (POP3) and **80** for your outgoing server (SMTP), and then click **OK**.

NOTE: If you have trouble sending email you can also try 587, 25, or 3535 for your outgoing server (SMTP) port.

10. Click **Test Account Settings**. Microsoft will send itself a message to test your incoming and outgoing capabilities. Once this is complete, click **Next**.

11. Click **Finish**.
